STRATE – INNOVATIVE SEWAGE TECHNOLOGY

STRATE
BY TALIS

For more than 70 years, STRATE has stood for innovative and comprehensive product and problem-solving competence in sewage technology.

Emerging from the company Wilhelm Strate VDI, founded in 1949, and the later STRATE Maschinenfabrik für Abwassertechnik GmbH, the company initially manufactured, maintained and repaired cooling systems, air conditioning compressors and industrial compressed air systems.

In 1954, elastic pipe feedthroughs for pressure pipelines were developed at the request of customers and were used for the first time in sewage pressure pipelines.

The company subsequently developed sewage pumping stations with the patented separator system, which effectively protects the pumps used from clogging. AWALIFT sewage lifting units are today the best known STRATE products, which is proven by over 35,000 units sold. Due to the optimum protection against clogging and the high pump efficiencies, they make a significant contribution to saving energy and maintenance costs.

Non-return valves as well as aeration and venting valves of all sizes were also developed in close contact with the customer and round off the company's sewage program. In the industrial sector STRATE supplies blower and compressor manufacturers with non-return valves and start-up relief valves for air and technical gases.

The STRATE service offers the customer a comprehensive range of services, from new installation and regular maintenance to the renovation and reconstruction of existing plants. The distribution of spare parts, naturally also for old plants, and an extensive fault diagnosis round off the service concept.

Current environmental regulations and the conscious use of valuable resources constantly require new, competent solutions and present cities, municipalities, industry and private households with a number of challenges. STRATE is the expert for innovative sewage and environmental technology.

Today, the company mainly supplies customers in the European markets, with Germany, the Netherlands, Great Britain, Italy, Poland, the Czech and Slovak Republics as well as Russia among the most important markets.

After the company was founded in Hanover-Wülfel, it was able to develop further in Laatzen-Rethen from the end of the 1950s, before moving to its current location in Sarstedt from 1992 to 1996.

Products for the waste water industry are the focus of STRATE at the Sarstedt site.

AWALIFT sewage lifting units are the main focus of the STRATE range, which is supplemented by other products such as special aeration and venting valves for sewage technology.

IMPORTANT INFORMATION TO THE PRICE LIST 2021

Please note also the sales and delivery conditions at the end of the price list.

With this issue, all previous issues of the price list become invalid. This price list contains only a part of our product range. If you would like to receive documents about our products that you cannot find in this price list, please contact us or your local sales office.

Technical progress constantly brings about changes and improvements which are taken into account in the production of our valves. We reserve the right to make changes or use materials of equal or higher quality.

Safe operation and maintenance instructions are decisive for proper installation. Resellers are obliged to pass on these instructions.

The illustrations are not binding for the design.

Please quote all operating data when making enquiries and placing orders.

Minimum order value

Please note that in view of the generally known cost situation, we can only execute small orders below a minimum order value of € 250,- net against payment of a processing fee of € 75,-.

Packaging costs

Our products require packaging as protection against transport damage. Costs for this are not included in the prices quoted and will be charged according to expenditure.

Pricing

Our prices are ex works excluding packaging.

Return deliveries

Return deliveries for credit note can only be made with the prior written consent of the supplier. For return deliveries with a value of less than € 500 (list price) no credit note will be issued. Likewise, no credit note will be issued for valves or fittings that are no longer included in the delivery programme, as well as for accessories, valves or fittings from individual production or for return deliveries that are made more than 12 months after the original delivery. In the case of freight-free return of stocked, new valves or fittings, a credit note of a maximum of 60% of the invoice value will be issued if the return delivery is made within 6 months of the original delivery. In addition, the Supplier shall be entitled to deduct or charge all costs incurred as a result of the return by the Supplier, in particular outward and return freight, freight compensation amounts, cartage, carrier costs, reconditioning costs, discounts reduced upon payment, etc. from the net invoice price to be refunded. Custom-made products are generally excluded from cancellations and returns.

150/EU	150	39,6	5850150000	5850150000	3.525,00

S= Standard

E= With built-on magnetic valve

U= With adjustable pressure relief valve

EU= With adjustable pressure relief valve and mounted

- Provides for the relieved starting of rotary blowers and single-stage Screw compressors up to unit capacities of 160 m³/min.
- They are started if no soft start or no control via frequency converter is designed for direct starting or in star-delta connection. The unit is strong is exposed to mechanical loads and requires a high starting current. During the A reduced back pressure should therefore be present during the start-up phase; this is achieved by Blow off the increasing volume flow.
- The fully automatic, medium-controlled STRATE EVA relief valve is specially designed for this Process constructed. It offers the advantage of being maintenance-free and also represents an extremely economic start-up relief, since the use of complex, externally controlled fittings or electronic starting aids can be omitted.

AIR VALVES

SERIES RSK - SB

TYP: SB

SANDWICH-TYPE NON-RETURN VALVE FOR AIR AND TECHNICAL GASES

STRATE RANGE

Options

- └ Special applications with changed material selection of the damper inserts on request

DN	TOTAL LENGTH (mm)	WEIGHT (KG)	MAT.-NR.	TALIS-CODE	PRICE (€)
SANDWICH-TYPE					
50	80	1,2	5610050000	5610050000	221,00
65	100	2,2	5610065000	5610065000	237,00
80	120	2,7	5610080000	5610080000	268,00
100	140	3,0	5610100000	5610100000	304,00
125	180	4,0	5610125000	5610125000	448,00
150	200	5,0	5610150000	5610150000	530,00
200	230	8,0	5610200000	5610200000	925,00
250	280	11,0	5610250000	5610250000	1.370,00

- Find worldwide recognition as a backflow preventer for universal applications in Conveying of air and gases for blowers and screw compressors.
 - Due to the sandwich construction for short construction lengths
 - Characterized by low flow resistance and high operational safety
 - Seals reliably even at low back pressures
 - Offer excellent economy and durability
- The STRATE sandwich swing check valves SB are suitable for use in the following applications due to their special, lightweight Aluminium construction and the use of silicone flap inserts ideal for:
 - The conveyance of air and gases up to temperatures of 200 °C
 - Operating pressures up to 4 bar
